## The Finnish Network for Sustainable Mining

The multi-stakeholder network, **built on co-operation, dialogue and trust**, promotes more responsible practices for mines in Finland based on international approaches.

5

## Achievements

- Trust
- dialogue → bridging the gap
- Transparency
- Common understanding → co-operation and mutual benefits
- Consensus decisions and joint statement
- Tools → reporting, TSM-based sustainability system and local practices
- Foundation for a permanent operation
- Synergies between national and local level multi-stakeholder cooperation

6

KAIVOSVASTUU

## Challenges

- Neutrality, independence, credibility
- Listening and understanding
- Use of power and decision making
- Turnover of the members, continuity, consistency, new energy and ideas
- Motivation
- Discuss tough issues, find solutions and agree to disagree
- Communications and media

**IT'S NOT EASY BUT IT'S WORTH IT!**
