

Mining with Nature

The Swedish mining and minerals industry's
road map for biodiversity net gain

By Tove Hägglund, Ecogain
At Svemin's Environmental Conference 2020

Purpose and aim

Purpose to:

- Facilitate the industry's proactive work for biodiversity
- Strengthen the industry nationally and internationally

By:

- Producing a road map for biodiversity with a clear goal and concrete actions

The 2030 goal

The Swedish mining and minerals industry's target is by 2030 to contribute to a net gain in biodiversity in all regions where mining and minerals operations and prospecting take place.

This means that the industry will be investing further in developing innovative solutions for achieving sustainable land use in harmony with nature.

Adopted by Svemin's board in september 2020
